

BAKKAFROST FAROE ISLAND SALMON

PRODUCT PROFILE

Bakkafrost is the largest salmon farmer in the Faroe Islands raising 50,000 metric tons per year serving a global market. They maintain full control of their salmon from egg to harvest, and manufacture their own salmon feed to control the diet and welfare of the salmon. The feed is 50% marine protein and marine oil, that's 3 times more than the industry standard. It is ASC certified salmon and Bakkafrost uses fresh and wholesome fish trimmings from other fish plants to subsidize our salmon feed ingredients, so they're not heavily dependent on pelagic species of fish.

PRODUCT HIGHLIGHTS

- No Ethoxyquin in the salmon feed, 3 days from manufacture to feeding
- No GMO's
- No Hormones
- No Anti-Biotics
- No Pesticides
- No Additives/Preservatives or Chemicals
- No anti-fouling chemicals or copper in our nets
- Highest ratio of omega 3 to omega 6 (anti-inflammatory benefit)
