Sixty South Salmon

"Pure Antarctic Salmon"

SIXTY SOUTH
PURE ANTARCTIC SALMON

Sixty South is the first and only source of premium, sustainable salmon raised in the pristine icy waters from the Antarctic, nested inside Alberto de Agostini's National Park and protected by the world's purest and coldest waters. It operates the world's southernmost farms over 8-10 hours away from any city or town, following strict environmental practices to raise salmon on Natures Terms.

100% Never Ever Antibiotics Used

Sixty South is one of the only true antibiotic free salmon in the world. From egg to harvest, it is never treated.

No Farm Chemicals & Antifoulants

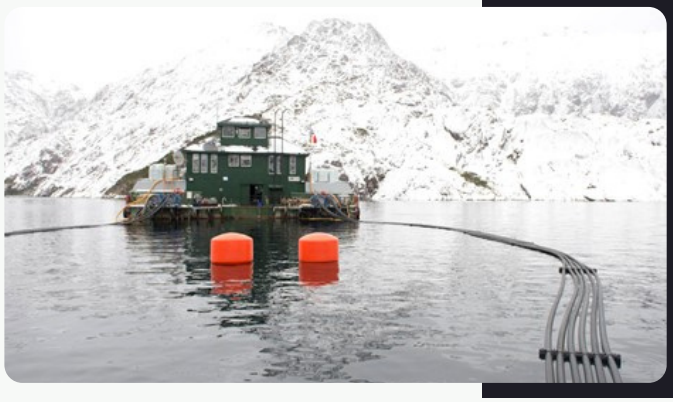

Ocean pens are never coated with antifoulant chemicals that harm the environment. Instead, they are hand cleaned daily.

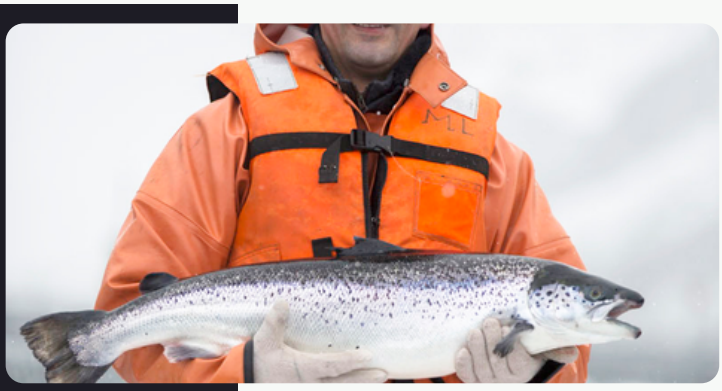

No Added Hormones or Growth Promoters

Sixty South salmon grow slowly and richer thanks to our cold temperatures. It takes 2.5 years to reach harvest size.

Raised in Icy Cold Waters Year Round

Sixty South salmon enjoy a stable flow of Antarctic water throughout the year. Colder than Europe and North America.

Pure Pristine Surroundings

Sixty South is completely isolated, far away from cities and industry. Raised in waters free of toxins and industrial pollutants.

Large Open Spaces with Room to Grow

Sixty South farms are spread far from one another and each pen is spacious with <1.5% fish to 98.5% water.

Well Marbled and Rich in Omega-3's

Salmon raised in low temperatures naturally accumulate more healthy fats, a richer marbling and buttery flavor.

Environmental Resting Periods

After every harvest we relocate our farms and allow the environment to rejuvinate, completely undisturbed for up to 6 months.
