

VALHALLA ORGANIC SALMON

VALHALLA
ORGANIC SALMON

About Valhalla

Valhalla Norwegian Organic Salmon is sourced from a collective of small, artisanal independently owned farms along Norway's pristine coastline. Each farm follows strict organic practices and is supported by a European processor that ensures the salmon is immediately handled, packaged, and shipped. The result is a consistently premium product that reflects the purity of its origin and the integrity of those who raise it.

Valhalla salmon are raised with care in carefully chosen sea sites, where deep Norwegian fjords offer ideal conditions - clear, cold water, high oxygen levels, and strong currents that mimic the natural environment. Stocking densities are kept low (just 1% fish to 99% water), minimizing environmental impact and allowing the salmon to grow. Every step of production - from feed to hatchery to harvest—is audited by Debio, Norway's leading organic certification body.

The feed is entirely organic, GMO-free, and derived from fish trimmings already destined for human consumption. Valhalla is certified by Debio Organic, Global GAP, ASC, and BRC Food. Valhalla Organic Salmon isn't just responsibly farmed—it's farmed to a higher standard.
